

WEB AND INTERNET ENGINEERING - FINAL PROJECT

EATKRAKEN

RAFFAELE TRANQUILLINI, FRANCESCO PICCOLI, GIULIO SCIORTINO

EATKRAKEN

- Eatkraken is an online food delivery system which allows customers to buy food and restaurant owners to showcase and sell their restaurants' dishes

- The philosophy behind Eatkraken is to get restaurants in contact with customers as easily as possible for hassle-free food delivery. Much attention is given to users' needs such as allergies and food regimes

AS A CUSTOMER...

- I want to order food from my favourite restaurant so that I can have it delivered at my place in respect of my personal needs and health condition

AS A RESTAURANT OWNER...

- I need to receive my clients' orders in an orderly and clear fashion, so that I can serve them in the shortest time possible.

FRONTEND

- HTML
- CSS
- JAVASCRIPT
- AJAX
- BOOTSTRAP

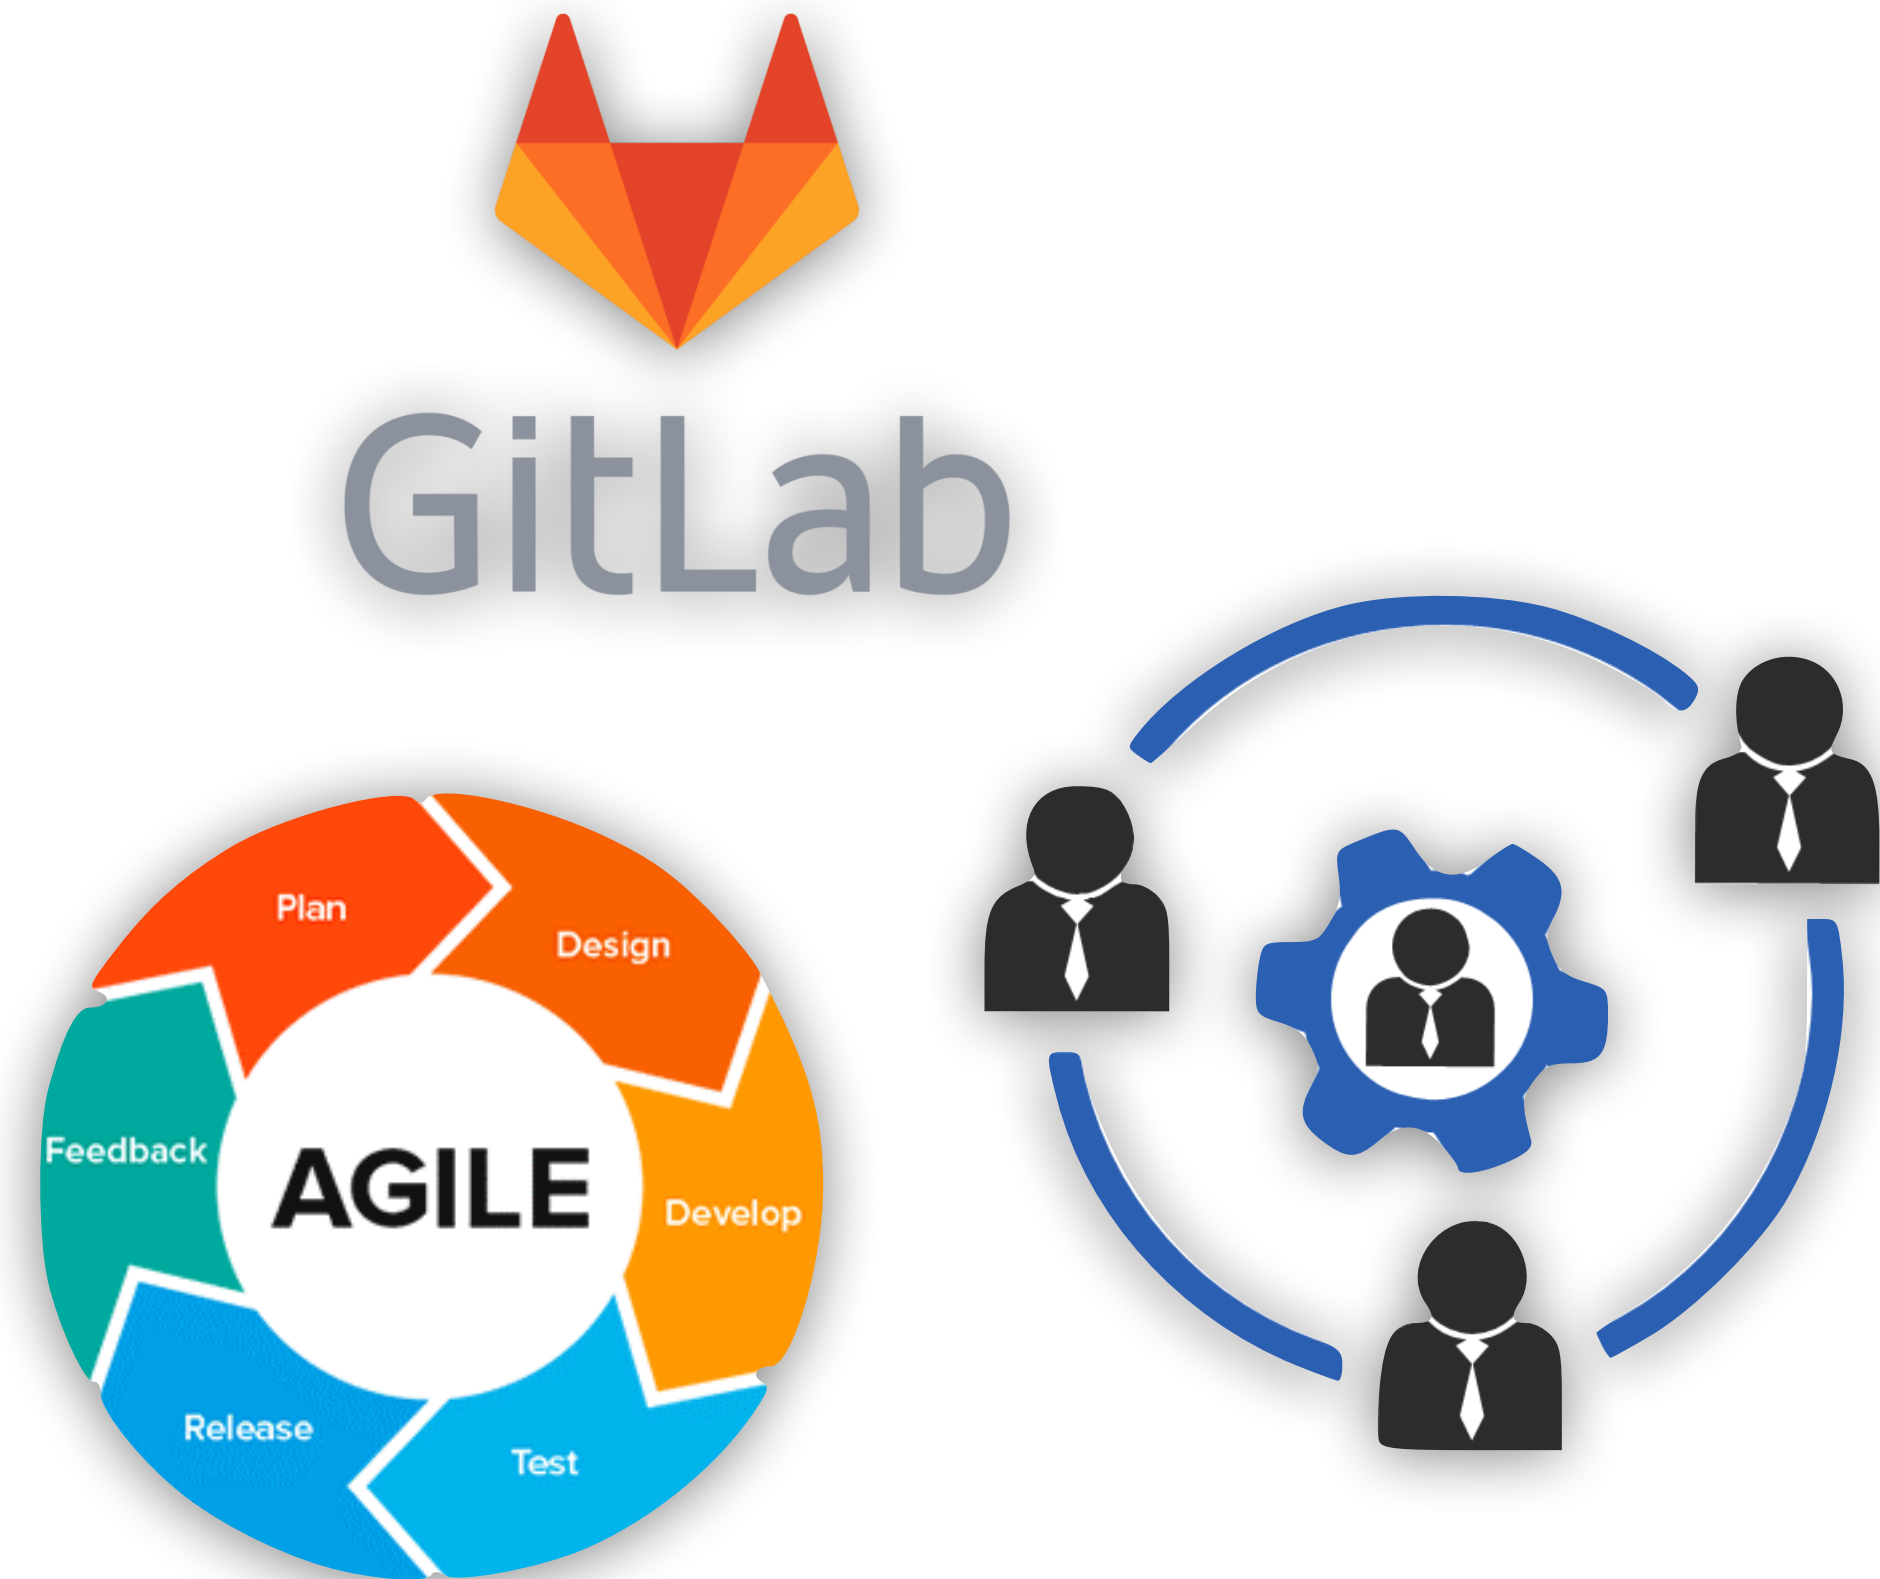

BACKEND

- PHP 7
- PDO
- POSTGRESQL
- PHPMAILER

DEVELOPMENT PROCESS

- AGILE DEVELOPMENT
- WEEKLY ONLINE MEETINGS
- GITLAB PROJECT
- INCREMENTAL DEVELOPMENT

Thank you for the attention
